WINDOW COVERS

**The perfect complement to
your home's windows**

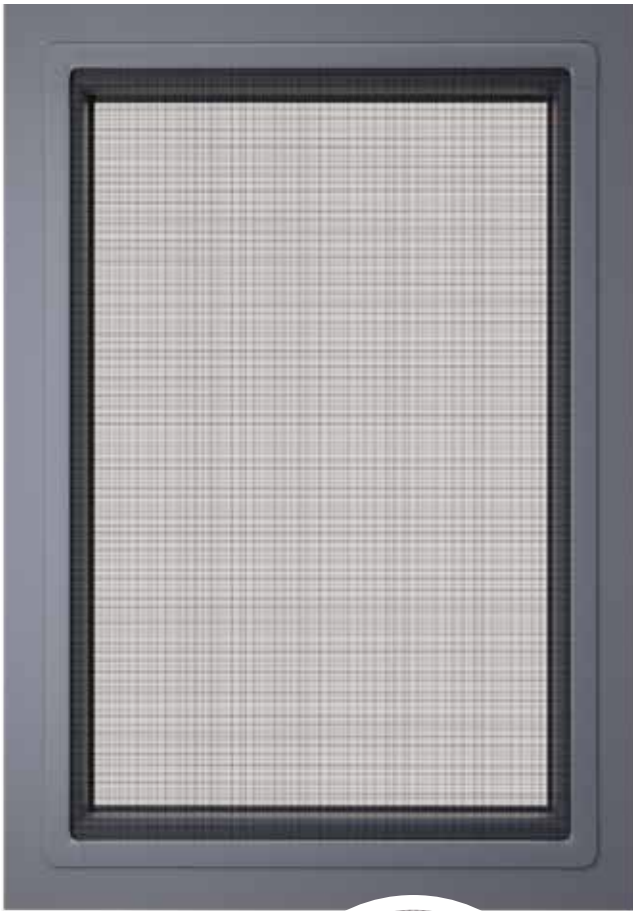

Frame mounted mosquito net

DK-MO

An aesthetic, elegant mosquito net mounted to the window frame to protect your home from unwanted insects. After the season it can be easily removed and cleaned, which will increase the life of the product. We will also install the DK-MO frame mosquito net on a fully built-up window frame or a window with a roller blind.

Advantages

- Non-invasive installation with swivel brackets
- Compatible with most window profiles
- Aluminium profile
- 2 variants to choose from:
 - with „fin” adjacent to the window frame
 - with brush seal
- Easy removal during the winter season

Roll-up mosquito net

An extremely functional solution that allows the mosquito net to be smoothly rolled and unrolled into a concealed cassette on the window frame. A special slowing mechanism is responsible for the protection against breakage and damage here, thanks to which the operation of the mosquito net will be comfortable and convenient for many years.

Advantages

- Can be retracted into the cassette with guides and spring mechanism
- Cassette mounted directly on window frame
- Smooth and safe operation thanks to a retarder

Sliding frame mounted mosquito net

The DK-MP panoramic sliding mosquito net is the perfect complement to a conservatory, terrace, balcony or patio exit during the summer season. The wide range of available running rails allows it to be fitted to almost all types of doors, and the brake and bumper on the wing guarantee its safety and comfort of use

Advantages

- Sliding sash between top and bottom running rail
- Running rail with mechanism in the bottom section
- Infinitely variable adjustment of the inclination angle of each leaf
- Compatible with various door types
- Brake to slow down the movement of the leaf in the end position
- Bumper to prevent the mechanism hitting the rail

Side pleated mosquito net

Increased durability and weather resistance are provided by a structure made of aluminium profiles. Due to the smooth sliding movement, using the system does not require much force. When closing, the mosquito net rolls up into an accordion and partially retracts, providing a large passage light. Three types of bottom profiles allow the system to move freely according to the user's requirements.

Advantages:

- Pleated net mounted on an aluminium profile structure
- Smooth sliding without the need for force
- Net is partially retractable in the side guide
- 3 types of bottom profiles to choose from (standard, flat, slanted)
- Maximum dimensions: 4000 mm x 2700 mm

Vertical pleated mosquito net

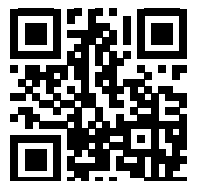

An ergonomic mosquito net that allows fast and smooth opening thanks to special springs in the bottom guide. It doesn't require a lot of force, even with large structures. The components of the tensioning system are concealed under the cover profile.

Advantages:

- Pleated net mounted on a structure made of aluminium profiles
- Smooth, effortless sliding
- Tensioning elements concealed under the cover profile
- Cover profile can be detached and plugged in Maximum dimensions: 2300 mm x 2000 mm
