

# Wooden panel framed door

## Yvoire model

Classic design of Yvoire exterior doors with large glazing will perfectly fit in rustic house designs. Wooden filling, decorative mouldings and window muntin emphasise a traditional character of the building. Overall design ensures optimal thermal and acoustic insulation and safety parameters.

### Striking design

Thanks to the combination of traditional forms and modern, distinctive colours the Yvoire doors are perfect for both traditional and modern buildings. A traditional letterbox ensures additional uniqueness. The whole unit can make even a simple building fashionable and classy.

### Warm solution

Good thermal insulation parameters ensure a warm interior and cut back on the energy needed to heat your home. It's crucial from the perspective of financial savings and ecology.

### Top quality guarantee

The use of the best available materials ensures the door's high aesthetic value, as well as comfortable and reliable use.
