

DA-77 exterior aluminium door

– NOEL MODEL

DAKO's elegant, contemporary profiled exterior doors are a reliable choice for years to come. With its excellent thermal insulation properties, the DA-77 system is the perfect choice for modern residential buildings, public properties and demanding commercial buildings.

Durability and thermal insulation

Its excellent performance parameters meet a wide variety of requirements in terms of insulation, airtightness and user comfort. The extensive furnishings guarantee the highest product quality in accordance with current building standards. Furthermore, the reinforced profile design of the DA-77 aluminium door allows for larger, customised formats.

Warm choice in line with investors' requirements

The high thermal insulation parameters of the door help maintain thermal comfort and reduce energy loss even on cold winter days. Energy efficiency is confirmed by a heat transfer coefficient (U_w) of 1.1 W/m²K and the use of a three-pane glazing unit, which together contribute to significant savings. The unique airtightness and the applied technologies allow our product to reduce heating expenses.

Top-grade security

With a sturdy frame and sash design and safety features to boot, this door guarantees high burglar protection. Top-quality workmanship ensures many years of trouble-free, reliable and ergonomic use.

Discover key technical details:

- Installation depth: 77 mm
- $U_w=1.1$ W/m²K
