

Wooden frame-panel doors - DDF-68 system

LONDON model

Wooden frame-panel doors

- Traditional wooden doors - a solution of delightful beauty coming from nature ideal for lovers of natural beauty and timeless aesthetics.
- Classic design - perfectly matching rustic projects or interestingly complementing more modern developments.
- Natural raw material adding uniqueness - distinctive and unique wood grain makes each wooden door unique and one of a kind.
- Thermal insulation at the optimum level - the wood from which the doors are manufactured is characterized by optimum thermal insulation parameters, guaranteeing warm interiors for homeowners.
- A wide range of designs and finishes - elegant proposals for subtle milling or impressive glazing, allow to match the appearance of the door to the tastes of even the most demanding investors.
- Guarantee of high quality - the use of the best raw materials ensures the high aesthetic value of the door, as well as its comfortable and reliable use.

Parameters of wooden frame-panel doors (1100x2150mm)					
System	Uw	Resistance to wind load	Waterproofing	Air permeability	Rw
DDF-68	1,6	NPD	2A	4	NPD
