

Wooden panel doors - DDF-68 system

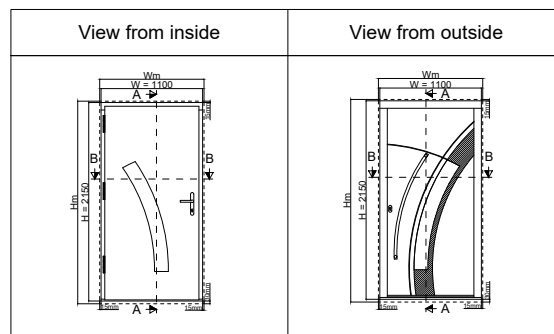

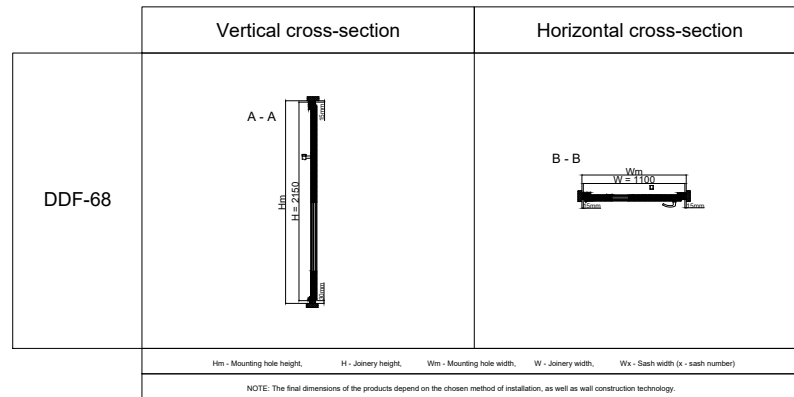

GLORIA model

Wooden panel doors

A wide selection of designs allows DAKO doors to perfectly match other products, i.e. windows, roller shutters or garage doors.

A wide selection of colors combined with the use of the highest quality materials ensures high aesthetic value and makes DAKO doors perfectly fit into the prevailing architectural trends on the market. The construction solutions used allow the door leaves to be made in a single plane, so that the leaf profile is invisible and constitutes a single plane from the inside and outside of the door.

DAKO exterior doors provide security, optimal thermal insulation and protection from the weather. Their high class is evidenced by comfortable and trouble-free use, which makes DAKO doors become a timeless symbol of the house.

Parameters of wooden panel doors (1100x2150mm)							
System	Glazing package	U _w	U _g	Resistance to wind load	Waterproofing	Air permeability	R _w
DDF-68	33.1x14x4x16x33.1	0,64	0,5	NPD	4A	4	NPD
DDF-78	33.1x20x4x20x33.1	0,58	0,5	NPD	2A	4	NPD
DDF-92	33.1x16x4x20x4x14x33.1	0,56	0,5	NPD	E900	4	NPD
<small>U_w - heat transfer coefficient of the window, U_g - heat transfer coefficient of the glazing package, R_w - acoustic properties</small>
